

HP PUMPS (MAX 71 L/MIN & 350 BAR)

XLTI SERIES

The Hawk plunger pumps from the XLTI series can be conceptually divided into two groups. The pumps from the first group are designed to reach a very high water pressure (maximum **300 bar**): this type of pumps, thanks to the pressure performances, is mainly suitable for use on **high-performance professional pressure washers**. The pumps belonging to the second group instead can work with a high water flow rate (up to **54 l/min** at 1450 rpm). The performances of this group of pumps make the XLTI suitable for use on **automatic car wash gantries**, on **small vehicles used for urban cleaning services** or on **misting and fire-fighting systems**.

FIELDS OF APPLICATION

High pressure washer

Car-Wash

Municipality

Fire fighting

TECHNICAL DATA

Max pressure (bar)	300
Flow rate (l/min)	from 17 to 65
Manifold	brass
PTO	male shaft Ø 24 mm
